HOW IT WORKS:

Nature's Harmony® Oregano Oil contains the constituents carvacol and thymol. Working together, these compounds give Oregano Oil broad-spectrum antimicrobial properties. The carvacol and thymol inhibit bacterial growth, with additive or possibly synergistic activity. Oregano Oil inhibits the growth of intestinal parasites. Wild oregano is also rich in mucopolysaccharides—compounds that help decrease inflammation, and natural solvents that break down fungal cell membranes. Oregano Oil is also a potent expectorant and worm expellant.
