

HGH Activator with Alpha-GPC

Nature's Harmony® natural HGH (human growth hormone) is formulated specifically for individuals concerned with peak performance and youthful body composition. This unique formula combines ultra-pure alpha-GPC with New Zealand deer antler velvet and soy protein for maximum results.

PRODUCT CODE: 400720

HEALTH SOLUTIONS:

RECOMMENDED USE	DOSAGE FORM	RECOMMENDATIONS
Supports cognitive health in those experiencing mild to moderate cognitive decline. Contains deer antler velvet which is used in Traditional Chinese Medicine to tonify the kidneys and fortify the yang.	Capsule	Adults - aged 60 years and older, take 3 capsules three times daily. For use beyond six months, consult a health care practitioner.

DESCRIPTION:

Nature's Harmony® HGH Activator combines naturally sourced alpha-GPC (alpha-glycerolphosphorycholine) with New Zealand deer antler velvet and soy protein to provide 20 amino acids (including all eight of the essential amino acids the body does not produce), vitamins and minerals. This specially formulated nutritional supplement helps promote the secretion of HGH. HGH—or human growth hormone—is your body's most important hormone. It is the hormone that controls your growth, physical strength, mood, the aging process, and your body's ability to repair itself.

Recommended Daily Allowance: N/A

Food Sources: None for alpha-GPC or deer antler velvet; however, choline is available from legumes such as soybeans, peanuts and green peas, as well as from egg yolks, liver, kidney, brewer's yeast and wheat germ.

Causes of Deficiency: Production of human growth hormone decreases significantly with age.

Symptoms of Deficiency: Aging: loss of memory, age-related muscular problems.

Complementary Nutrients: Lecithin.

HOW IT WORKS:

HGH Activator works to stimulate the release of human growth hormone—your body's own natural youth-enhancing mechanism. Up to 40% of alpha-GPC is choline and choline can be metabolized to acetylcholine. Once absorbed through the gastrointestinal tract into all blood cells and tissues, acetylcholine acts on the central nervous system by naturally stimulating the pituitary gland to release HGH. The release of HGH has a stimulatory effect on other related hormones in the body, thus offering a multitude of unique health benefits that range from improving athletic performance and body composition to boosting memory.

HGH Activator with Alpha-GPC

RESEARCH:

Studies on alpha-GPC have shown it to increase the effectiveness of growth hormone release hormone (GHRH) to increase human growth hormone (HGH) secretion and to positively affect balance, coordination, lean muscle mass, strength and neurotransmitter systems involved in the development of age-related memory dysfunction. Deer antler velvet has been used in traditional Chinese medicine for centuries to help promote hormonal activity, muscular growth and oxygen uptake.

SIDE EFFECTS:

No known toxicity or serious side effects. Nature's Harmony® HGH Activator is well tolerated.

INTERACTIONS AND SAFETY CONSIDERATIONS:

Consult a health care practitioner prior to use if you are pregnant or breastfeeding. Consult a health care practitioner if you experience agitation, heartburn, constipation, nausea, headache, insomnia, or light-headedness.

LABEL:

Natures Harmony®

Activateur HCH

avec alpha-GPC et bois de velours de chevreuil

Soutient la santé cognitive pour les cas de déclin cognitif de léger à modéré
