

Treemenda™ Lice Stop™ Kit

Nature's Harmony® Lice Stop™ Kit is an all-natural lice and egg removal system. Valued for its astonishing antiseptic and antifungal properties, tea tree oil is gentle to a child's scalp and skin. This kit combines the potent antiseptic properties of tea tree oil and oregano oil to provide a chemical-free and highly effective head lice treatment.

PRODUCT CODE: 725400 (Kit)
725410 (Solution)

DESCRIPTION:

Over-the-counter head lice shampoos contain chemical pesticides. The two most common are pyrethrin and permethrin. Pesticides can cause serious side effects, such as asthma, respiratory failure, pneumonia, vomiting and muscle paralysis. A further concern is that lice are already developing resistance to these standard chemical treatments, as reported in research studies in Canada and the US.

Nature's Harmony® Lice Stop™ Kit's unique, natural, non-toxic special formulation speeds up healing while reducing itching and soreness caused by head lice bites.

Lice Stop™ uses a 60 mL (2 oz) liquid Tea Tree Oil Conditioning Solution in conjunction with a unique metal pin lice and nit comb to help rid the hair of lice and their eggs. The package also contains a scalp cap—to protect eyes and to hold solution on hair.

HOW IT WORKS:

Tea tree oil is widely recognized as an effective anti bacterial, antifungal and antiseptic agent. It has a complex chemical composition that makes it difficult for organisms (like head lice) to develop a resistance to it. The ingredients in Lice Stop™ help oxygenate skin cells and repair skin irritations. It also has mild anesthetic properties.

Tea tree (*Melaleuca alternifolia*) belongs to the same family of plants as the eucalyptus tree. It contains a substance known as terpinen-4-ol, which has been identified as the healing property of the plant. Research shows that this compound has a high solvent action that attacks mature lice and dislodges them from the scalp. The result is a high mortality rate of lice after the first application.

Melaleuca, which means black and white (believed to be a reference to the appearance of the tree bark shortly after a bushfire), has been used for centuries by Australian Aboriginals. The Aboriginals discovered that the essential oil from the leaves of the tea tree provided a natural cure for a wide variety of ailments.

Instructions:

1. Use on dry hair.
2. Shake Lice Stop™ Conditioning Solution well before using.
3. Lightly massage half the contents of the bottle (approximately 30-40 ml) into hair. Apply enough Lice Stop™ Hair Conditioning Solution to saturate hair and scalp. Place enclosed protective scalp cap on head to cover hair.
4. Leave on for 10 to 15 minutes.
5. Remove cap and rinse hair and scalp thoroughly with water and dry with towel.
6. To remove lice eggs (nits): Comb wet hair with regular comb to remove tangles. Do not reuse this comb prior to cleaning. Separate half-inch sections of hair, and using the enclosed Lice Stop™ Nits Comb tilted towards the scalp, comb hair from scalp to ends. Repeat several times on this section of hair, and then repeat on all sections of hair until entire head has been combed.
7. Repeat treatment 7 to 10 days later, following steps 1 through 6.

DID YOU KNOW...

In Canada, at any given time, there are over 80,000 elementary school-aged children infested with head lice.

Tremenda™ Lice Stop™ Kit

RESEARCH:

Unique to Australia, tea tree oil is one of the most researched and scientifically proven therapeutic oils known today. Results of various scientific studies have shown that tea tree oil is twelve times stronger than phenol, a universal antiseptic substance. Yet this potent oil is a safe, non-toxic and completely natural antiseptic that is gentle to the skin. Tea tree oil's overall effectiveness has been evaluated by many different organizations, among them the *Australian Journal of Pharmacy*. Their evaluation concluded that "tea tree oil is safe, easily accessible, and its side effects profile is superior to most products."

Oil of Oregano contains the active ingredient carvacol, a phenol with known antiseptic properties. In laboratory studies, oregano oil has been shown to possess a wide range of microbial and parasitic killing powers, and there is no known tendency for the development of resistance.

SIDE EFFECTS:

Tremenda™ Tea Tree products are formulated to have low toxicity and to be virtually non-irritating. However, tea tree oil is a highly concentrated essential oil, so label instructions should be followed carefully.

INTERACTIONS AND SAFETY CONSIDERATIONS:

Lice Stop™ Kit items should be stored out of reach of children. For external use only. Keep out of eyes. Do not use on wounds or broken skin.

OTHER CONSIDERATIONS:

Lice Stop™ Kit ingredients are not tested on animals and do not contain any animal ingredients.
